

Craig Barrett, Senior Energy Infrastructure Cyber Security Specialist

Craig Barrett is a senior cybersecurity subject matter expert for the Federal Energy Regulatory Commission (FERC) in the Office of Energy Infrastructure Security (OEIS). Prior to joining the Commission, Craig spent 18 years supporting large Federal enterprise level architecture, most recently as the Lead Perimeter Security Engineer at the Department of State.

Craig's primary role with the Commission is to provide leadership, expertise, and assistance in identifying, communicating, and seeking comprehensive solutions to significant potential cyber and physical security risks to Commission jurisdictional energy facilities. In addition, Craig collaborates with other federal and state agencies, the energy industry, and security organizations, to identify cybersecurity risks and vulnerabilities to the US energy infrastructure, as well as assists with the development of best practices and collaborative mitigation actions to minimize such risks.

Craig currently lives in Alexandria, Virginia, is a member of the DCRP Masters Swim Team, and also enjoys hiking, trail running, and other endurance sports.
