

JOSEPH F. BENNETT III

Vice President, Engineering

Joseph F. Bennett III is Vice President of Engineering for ITC Holdings Corp. In this role, he is responsible for the asset management, design and project engineering functions as they support the capital and maintenance programs for ITC's operating entities. Mr. Bennett was previously the Director of Facilities, Safety and Security where he directed ITC's overall safety and security programs and was responsible for the day to day operations and maintenance of the company's facilities.

Mr. Bennett has more than 25 years of experience in the electric utility industry including power generation, tariff administration, regulatory affairs, construction management and transmission operations. Prior to joining ITC in 2006, Mr. Bennett held a variety of roles in engineering, operations and management at Michigan Electric Transmission Company and Consumers Energy.

Mr. Bennett serves on the boards of the College of Engineering at Lawrence Technological University and the Michigan Science Center. He earned a Bachelor of Science in mechanical engineering with a concentration in energy systems from Michigan Technological University.

About ITC

ITC Holdings Corp. is the largest independent electricity transmission company in the United States. ITC provides transmission grid solutions to improve reliability, expand access to markets, allow new generating resources to interconnect to its systems and lower the overall cost of delivered energy.
